

Trissola Express

The first express blowout that can be customized to your clients' needs.

Trissola Express Blow Out Treatment reduces frizz and curl for typically 6-8 weeks by penetrating the cuticle with Keratin, Acai extract and three reparative marine algae's. Trissola Express Blow Out Treatment leaves the hair smoother, silkier and shiner. Hair is easier and faster to blow-dry. One hour service.

Step 1 – Prep the Hair

Shampoo hair twice with Trissola Prep shampoo.

Step 2 – Partial Dry

Dry hair about 80% using a blow dryer and section into panels.

Step 3 – Pre- Application

Mix 1 ½ parts True and 1 part Forever Ends. (amounts will vary based on hair texture)

Step 4 – Application

Apply solution away from scalp using firm brush strokes, beginning at the base. Do not apply directly on the scalp at any time! (gloves should be worn during steps 4 and 5)

Step 5 – Post Application

When all quadrants have been applied – comb through for even distribution and remove any excess solution

Step 6 – Dry

Blow Dry hair using a round or paddle brush, style to your clients needs.

Step 7 – Flat Iron

Finally, using our Trissola Dual Plate flat iron, start by taking 1-2" sections of hair and iron to the ends, passing over each section 3-4 times. For virgin hair use 450 degrees, for colored and chemically treated hair use 400-430 degrees and for over-processed, damaged and bleached blonde hair use 380-400 degrees or lower.

Aftercare

Do not shampoo for at least 8 hours after the treatment is done. Avoid getting moisture into the hair. Clients should continue to use Trissola hydrating shampoo and conditioner to ensure the longevity of the treatment.
